

Assistive Technology Innovation Center (ATIC): Advancing Accessibility Through Innovation

School of Business · University at Albany, State University of New York
Assistive Technology Innovation Center (ATIC)

Introduction

ATIC advances accessibility through AI, assistive technology and community-centered research, so that people with disabilities can lead more fulfilling and healthier lives.

What the Center Does:

- Develops new technologies
- Evaluates existing technology
- Supports innovation in assistive technologies

Our Priority:

Improve quality of life and employment for people with disabilities and support NY State in its efforts.

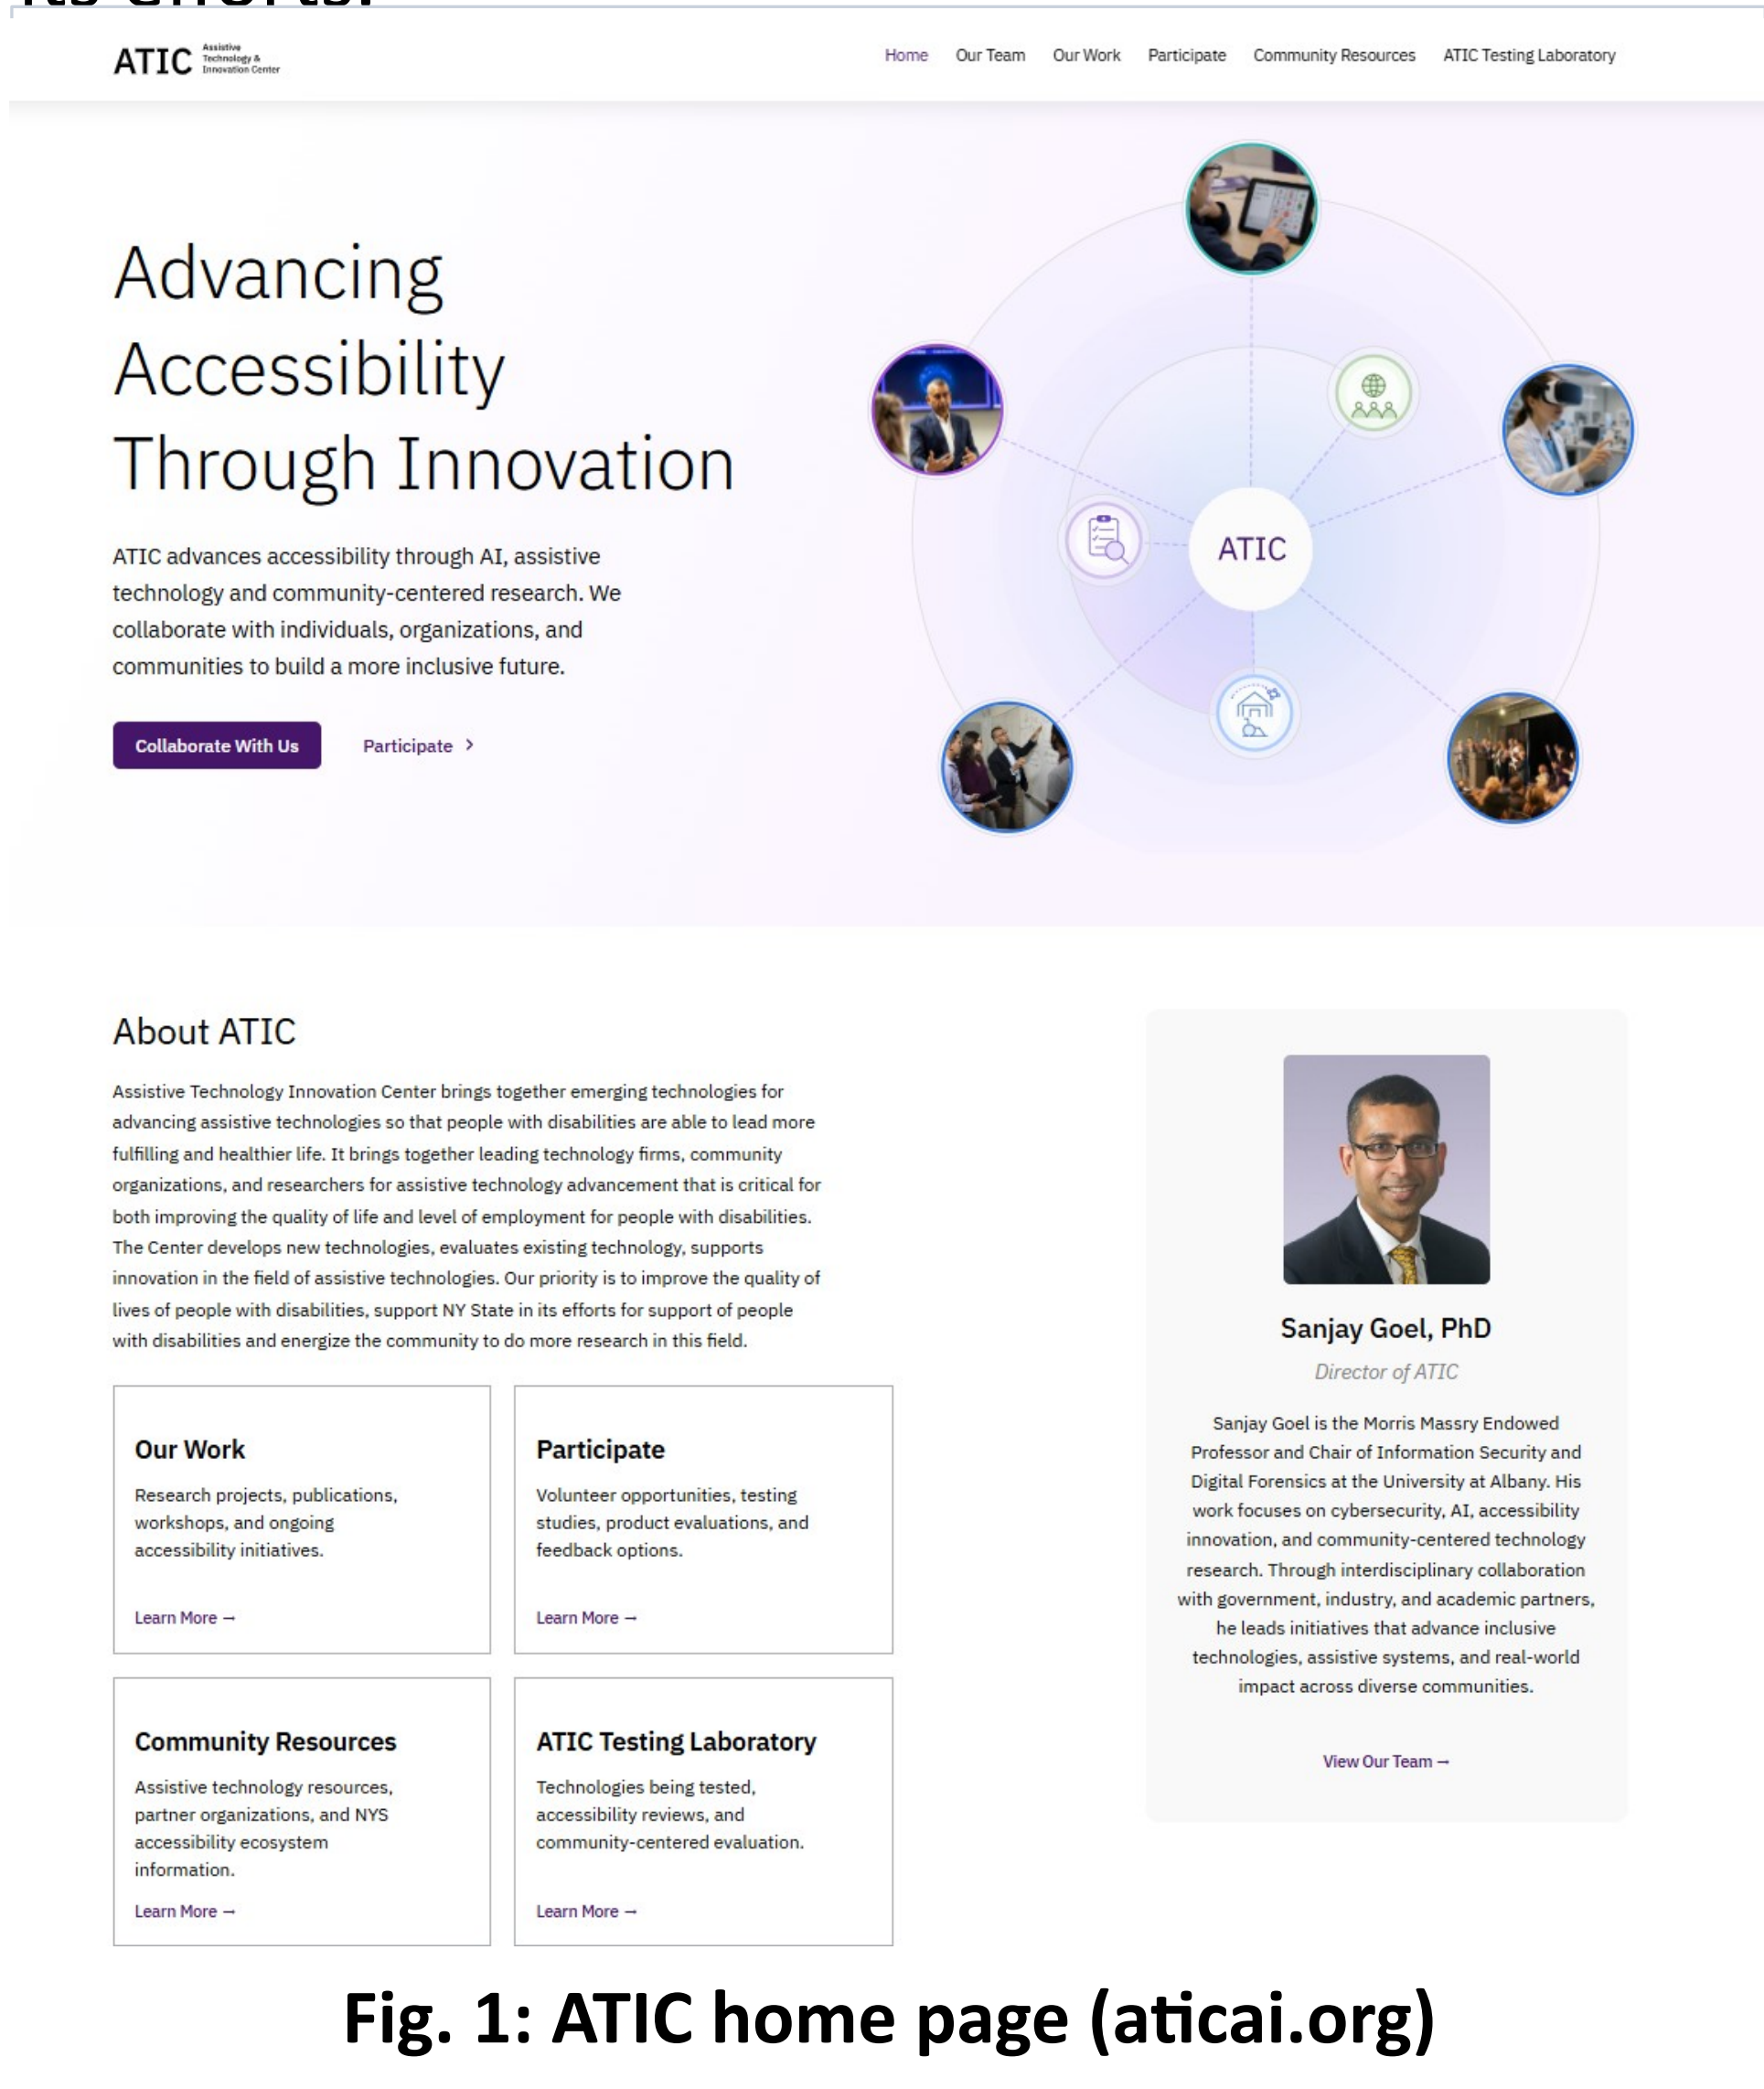

Fig. 1: ATIC home page (aticai.org)

Our Work

Research on AI, accessibility, neurodiversity, XR, adaptive learning, and mental health innovation.

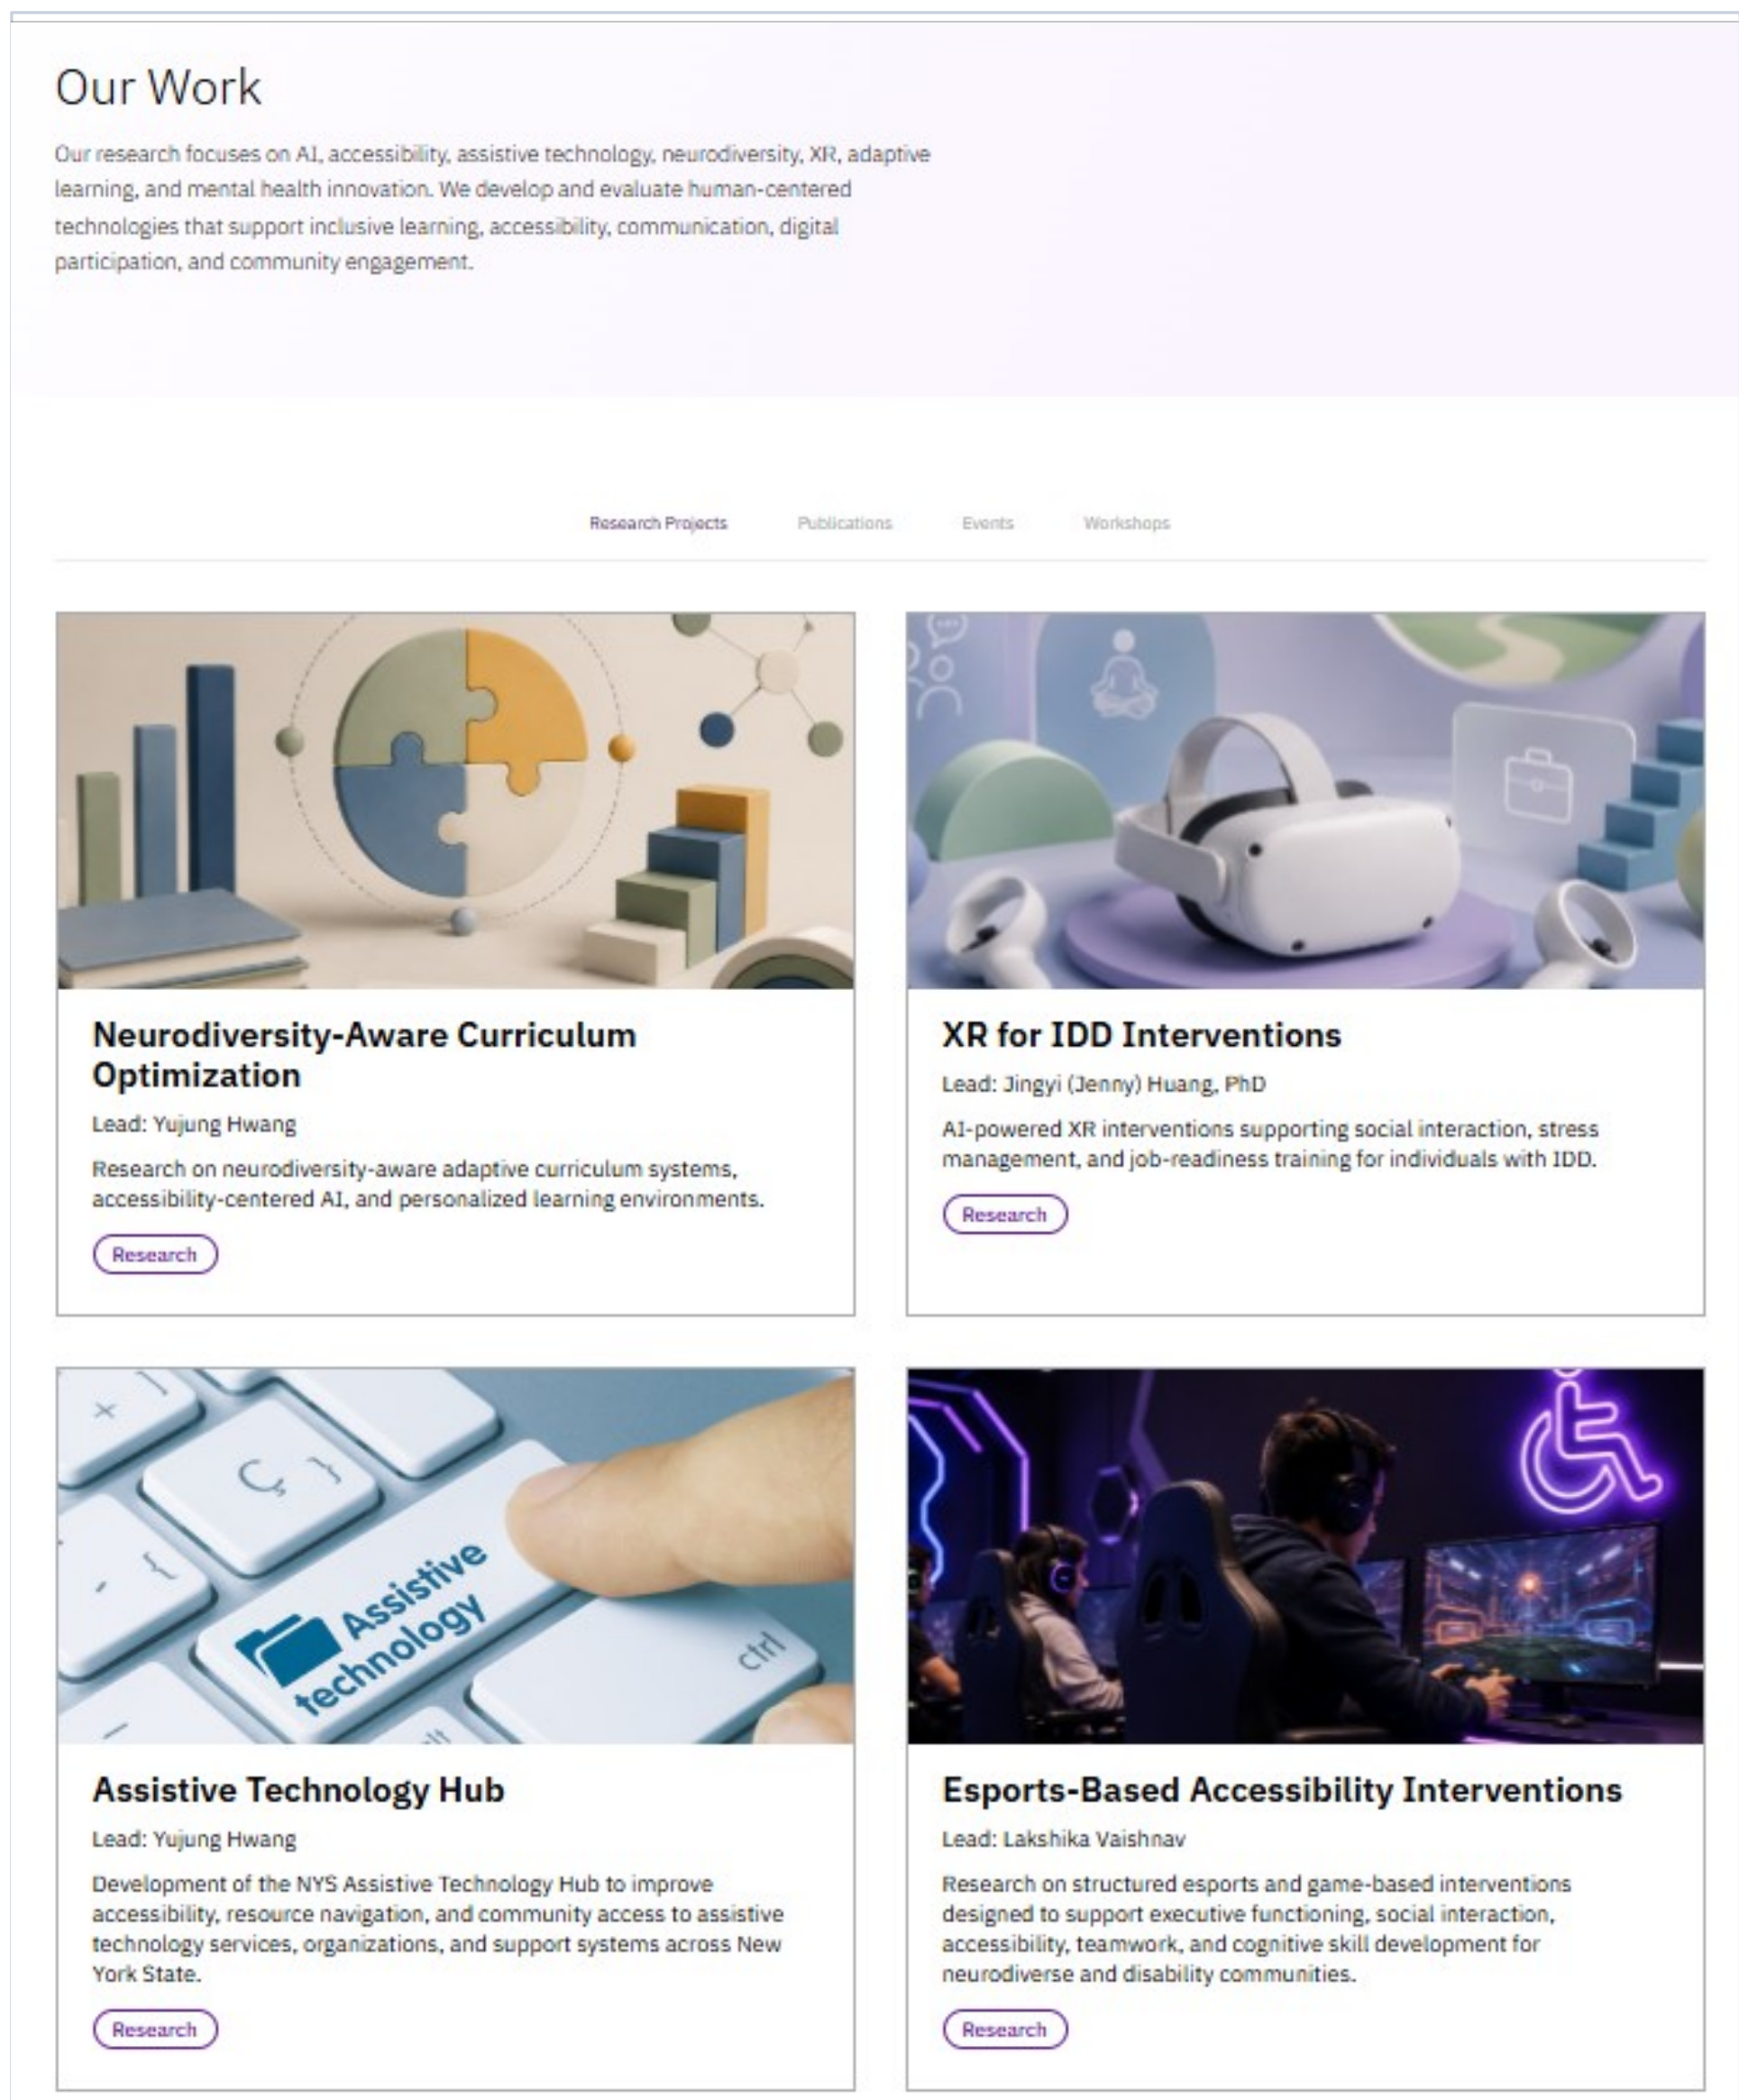

Fig. 2: Research projects on the Our Work page

Participate

Your involvement helps shape research, improve technologies and build a more inclusive future.

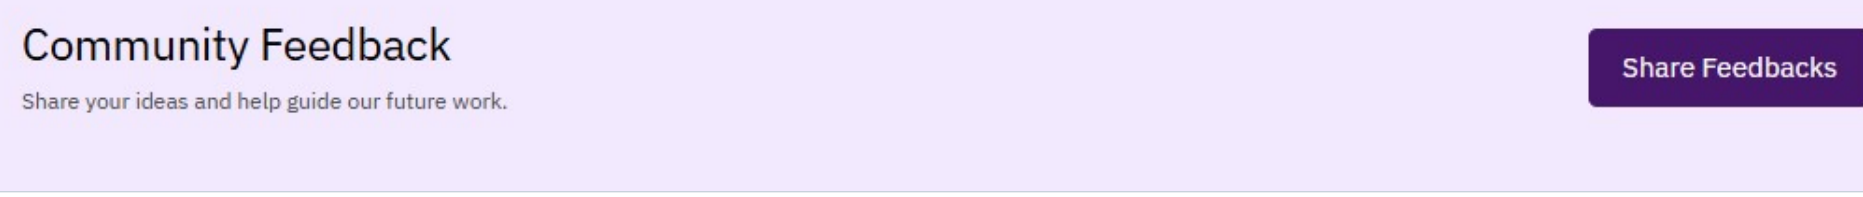

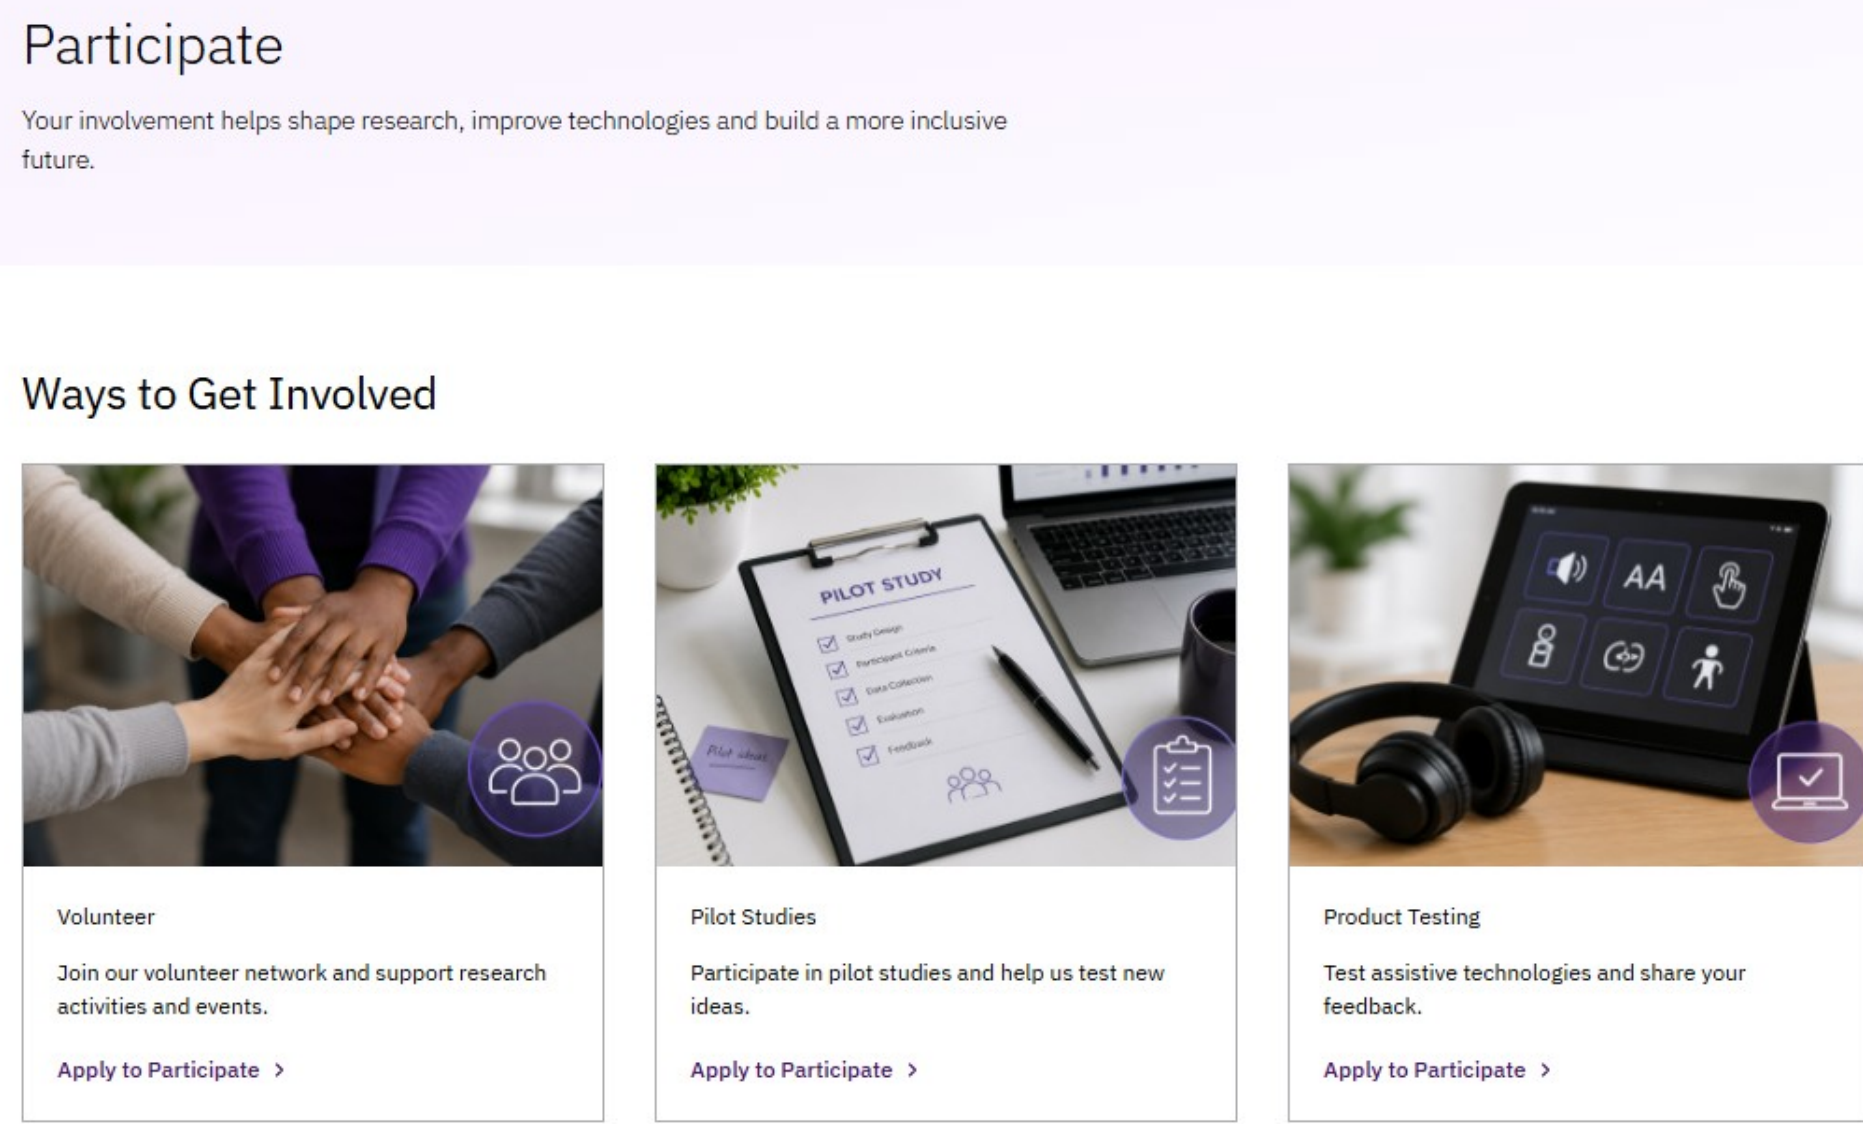

Fig. 3: Ways to get involved

- **Volunteer** – Support research activities and events
- **Pilot Studies** – Help us test new ideas
- **Product Testing** – Test assistive technologies and share feedback

ATIC Testing Laboratory

Structured evaluations of assistive and adaptive technologies across home, workplace, healthcare, and community settings.

Standards: WCAG 2.2 Level AA · Section 508 · EN 301 549

Latest Updates

Fig. 6: Recent workshops and events

- 21st Annual Symposium on Information Assurance (ASIA '26)
- 2nd Annual OPWDD Cybersecurity Summit
- 2025 DREAM Symposium

Community Resources & Partners

- **Assistive Technology Resources** – Guides, tools, and devices for communication, mobility, learning, and independent living
- **Partner Organizations** – State agencies, technology companies, and community organizations
- **NYS Accessibility Ecosystem** – OPWDD, Office of the Chief Disability Officer, and OMH
