UNIVERSITY AT ALBANY

UNIVERSITY AT ALBANY | RESEARCH & INNOVATION

Accessibility Technology & Innovation Center

ADVANCING ACCESS THROUGH HUMAN-CENTERED TECHNOLOGY

Technology for a more inclusive future

We research, design, and evaluate technologies that expand access and participation. Our work combines artificial intelligence, assistive technology, and community-centered research to address real needs across New York and beyond.

RESEARCH AREAS

AI & accessibility

Responsible, explainable AI and practical standards for accessible technology.

Neurodiversity & learning

Adaptive curriculum and learning systems shaped around diverse needs.

XR & assistive technology

Immersive and hands-free tools that support communication and participation.

Mental health & wellbeing

Clinically grounded multimodal AI research for mental health support.

ABOUT ATIC

ATIC brings researchers, community organizations, public agencies, and technology partners together to advance assistive technology and accessibility.

RESEARCH FOCUS

- Accessible & responsible AI
- Assistive technology
- Neurodiversity & learning
- XR and mental health

LEADERSHIP & CONTACT

Dr. Sanjay Goel

Director, ATIC

ATICAI.ORG

RESEARCH IN ACTION

- **Neurodiversity-aware curriculum**
Developing adaptive curriculum systems and personalized learning environments.
- **Speech-adaptive smart glasses**
A hands-free teleprompter aligns scripts to live speech and adapts reading pace.
- **XR for IDD**
Exploring immersive interventions for social interaction, stress management, and job readiness.
- **Assistive Technology Hub**
Improving access to assistive technology services, resources, and support across New York State.

LET'S BUILD MORE ACCESSIBLE TECHNOLOGY TOGETHER

Collaborate with ATIC on research, product evaluation, community partnerships, or student engagement.
